Cyber Hygiene

Small Habits, Big Protection

The everyday basics that stop most attacks

Presented by: **ZNexora Tech**

Personal hygiene for your digital life

Small routines, done every day, that keep you, your devices and our data healthy.

AT HOME		AT WORK	
Wash your hands	→	**Install updates**	Removes known weaknesses
Lock your front door	→	**Lock your screen**	Stops casual access
Copy important papers	→	**Back up your work**	Recover when things go wrong
Keep your home tidy	→	**Clean desk**	Nothing left for others to find

Most attacks exploit the basics

31%

of breaches now start by exploiting an unpatched vulnerability

Verizon DBIR 2026

99%+

of identity attacks blocked by phishing-resistant MFA

Microsoft Digital Defense Report 2025

$4.99M

global average cost of a data breach

IBM 2026

Attackers look for **the easiest way in**. Good habits close those doors.

Eight habits that make the difference

1 **Update**

2 **Lock**

3 **Back up**

4 **Clean desk**

5 **Strong logins**

6 **Think before you click**

7 **Use approved tools**

8 **Report**

We'll look closely at the **first four**, then quickly at the rest.

HABIT 1 · UPDATE

Install updates promptly

WHAT TO DO

- Install updates when prompted, don't postpone
- Restart your computer at least once a week
- Update your phone and its apps too
- Remove apps you no longer use

WHY IT MATTERS

Updates fix security holes that attackers already know about. Every day you delay is a day the door stays open.

QUICK TIP

Postponing? Pick a time today, like lunch, and restart then.

HABIT 2 · LOCK

Lock it when you leave it

WHAT TO DO

- Windows: press
- Mac: press
- Set your phone to auto-lock quickly
- Never share your PIN or password

WHY IT MATTERS

An unlocked screen lets anyone read your email, send messages as you, or copy files, in seconds.

QUICK TIP

Make it muscle memory: stand up, lock, then walk away.

HABIT 3 · BACK UP

Back up so you can bounce back

THE 3-2-1 RULE

3	2	1
copies	**storage types**	**off-site**

Three copies of important data, on two types of storage, with one kept off-site or in the cloud.

AT WORK

- Save work to [OneDrive / SharePoint / company drive]
- Not only on your desktop or a USB drive
- Back up your phone and personal files too
- Report anything missing or locked straight away

⚠ A backup you've never restored is only a hope. **Test it.**

Keep a clean desk and clear screen

WHAT TO DO

- No passwords on sticky notes
- Lock away papers and devices when you leave
- Collect printouts straight away; shred, don't bin
- Wipe whiteboards after meetings

WHY IT MATTERS

Visitors, cleaners and video calls can all see what's on your desk or screen. Paper leaks data too.

QUICK TIP

Before you leave each day: clear the desk, lock the drawer, log off.

HABITS 5 TO 8

Four more habits, in brief

Strong logins

Use a password manager, unique passwords and MFA. Never approve a prompt you didn't start.

Think before you click

Pause on urgent or unexpected messages. Check the sender and the link.

Use approved tools

No personal email, cloud, USB or public AI tools for company data.

Report

Something odd? Tell IT on [contact] straight away. No blame.

Covered in depth in our phishing, session theft and insider threat sessions.

Your daily cyber hygiene routine

Start of day

Install pending updates; check for odd sign-in alerts

Stepping away

Lock your screen, every time

During the day

Pause before clicking; save to approved storage

End of day

Clear desk, lock drawer, log off or lock

Monthly

Restart, review apps, check your backups

Altogether, it takes **just a few minutes a day**.

How healthy is your cyber hygiene?

- [ ] My devices are fully updated
- [ ] My work is saved to approved storage
- [ ] I use a password manager and MFA
- [ ] I use only approved apps and storage
- [ ] I lock my screen every time I leave
- [ ] No passwords on notes or my desk
- [ ] I never approve MFA prompts I didn't start
- [ ] I know how to report a problem

Missed any? **Pick one habit and start it today.**

QUESTIONS AND DISCUSSION

Small habits. Big protection.

Update. Lock. Back up. Keep it clean. Start today.
